SENGEREMA
HOSPITAL

Annual Report 2014

Sengerema

"I love to help the Sengerema hospital because during my clinical rotation in 2010 I met such a wonderful people who are working there under very difficult circumstances. I noticed that with some small efforts, it will be possible to make a difference and offer some substantial help to develop the hospital."

Maik Grundeken

"The place where my tropical doctors heart lies, a great experience and memory for life, a place that I will always stay in touch with and return to."

Femke Boot

"Sengerema is a place that changed my life for good. Not only did I meet my wife Laura there, but it is also the place where I took the final decision to become a specialist in tropical medicine and international health. Also I lost my heart to the people of Sengerema and to the hospital taking care of them. Often I tell my friends in Sengerema my heart has been living in two places for the last 5 years."

Niek Versteegde

"Since my internship in Sengerema in 2010 I still feel involved in the hospital. Together with Niek (who I met during my internship), I visited Sengerema for another 3 times since 2010 to make an inventory of the needs of the hospital. The staff always gives us a warm welcome and appreciates that the foundation of Friends of Sengerema Hospital is willing to help. Every visit we noticed the progress the hospital made for example with the water supplies. In 2014 we achieved a lot with the foundation, and 2015 will be even more exciting since Niek will support the hospital by working there as a medical doctor of Tropical Medicine. Sengerema has and will always have a place in our hearts."

Laura Duineveld

Introduction

Foundation Friends of Sengerema (Stichting Vrienden Sengerema Hospital, SVSH) was founded in 2011 by a group of passionate former student doctors of Sengerema Hospital. In the past few years our foundation has grown to an active and ambitious support to the hospital. Due to the overwhelming support of our donors we have been able to really make a difference for the hospital, its employees and its patients.

In 2014 a number of changes took place in our board. Maik Grundeken handed over his presidency to Pim de Ruijter and will remain active as a board member. Due to the imminent departure of Niek Versteegde to Sengerema, where start as tropical doctor in January 2015, the role of Treasurer will be covered by Inge Verdenius. Celine Bughwandass joined the board with as main focus fundraising.

In the next few years our foundation will focus on improvement of healthcare for mother and child. This includes improvement of maternal care, neonatal care and training of staff.

I am pleased to announce that Niek Versteegde will attend a job as medical officer in Sengerema for one year, starting in January 2015. We are proud that we are able to be closely involved in hospital care at Sengerema!

Despite the succes of our current projects much could be done to improve the level of care in Sengerema. We will continue our efforts to raise funds for our current and future projects. We feel supported by the generosity of our donors and we hope to continue to count on their support. Special thanks to all the people who support us to do the right thing!

Board member since 01-09-2014

Visits of the board in 2014

Anne van der Pluijm en Pim de Ruijter visited Sengerema Hospital for a period of three weeks in March 2014. Main goals of this visit were list progress of our projects, keep up contacts with the staff and an inventory of possible new projects. Anne made an inventory of our running projects and research about the hospital's poor fund. Pim installed the new monitoring equipment sponsored by the Laurentius Hospital Roermond and Rijnstate Hospital Arnhem. The staff was instructed in how to use the equipment.

Maik Grundeken visited Sengerema Hospital for two weeks in August 2014. Maik and Tessa made an extensive report about project progress and spoke to many members to the staff. This report is available in Dutch.

Stichting Vrienden Sengerema Hospital

- We strive for equal and close cooperation with Sengerema Hospital
- We pursue an open and transparent process
- We guarantee that 100% of donations go directly to Sengerema Hospital
- We join all those who care for Sengerema Hospital (Stichting Pius, Simba, interns, family and friends)
- We strive to reinforce local expertise and making medical care and education accessible for anyone
- We stand for: passion, involvement and transparency

Main focus of Stichting Vrienden Sengerema Hospital

Improving of standards of care for mother and child.

Project updates

Since the foundation of SVSH we have been expanding our activities in Sengerema Hospital. As our network, experience and opportunities are growing, we keep exploring in which manner we can help Sengerema Hospital in the most efficient way. In general we have made a distinction in two different project lines. Projects that run for prolonged periods of time and once-off projects.

Once-off projects

Hepatitis B vaccination

The Hepatitis B vaccination project, which started in 2013 and was initiated by dr. Charles Mguta, has been finalized in 2014.

The project was a major success, as the vast majority of health care workers chose to be tested and vaccinated against Hepatitis B. All participating members of staff were informed and counseled by local health care workers under supervision of our local project manager Charles Mguta. A total of 276 (96%) employees were tested and 261 people were vaccinated. This number was actually higher than expected, which caused to exceed the project budget by €2500. This project was partly supported by an award from the Albert Schweitzer Foundation.

Thirteen persons tested positive, which means they were having a chronic Hepatitis B infection. They were treated according to national standards in Bugando Medical Centre, which is the neighboring university teaching hospital in Mwanza. The project was supported and implemented in close collaboration with this hospital, which had implemented the same program one year before. By the time of writing this annual report it has become clear that the program will be continued and expanded by an American foundation called Americares. From 2015 onwards they will vaccinate all new personnel and all students working in Sengerema DDH. SVSH and SDDH consider this a great step forwards in safety for the health care workers of Sengerema DDH.

Mr Mihayo, senior nurse, about this project: *"We are very happy. This is very important for us. And, we are the second Tanzanian Hospital which is now immune for Hepatitis B!"*

A bed is a base

Hospital beds are essential for adequate nursing and recovery of patients. The current states of the hospital beds was poor. Thanks to CycleForFuture (special thanks to Hub, Rik and Hein), who did an effective fundraising for this project by a very tough over 2000 kilometer cycling event, we were able to buy second hand hospital beds and ward inventory from The Netherlands. The beds were transported with our container to Sengerema and are in use now on several wards.

Protective gear for labour ward

Health care workers safety is an important issue to our foundation. As all our board members are doctors, we can easily imagine the physical and mental challenges of healthcare workers to work in an unsafe environment. We feel that all healthcare workers should be working in an as safe as possible environment. Therefore we sponsored the hospital to make and purchase personal protective gear for about fifty healthcare workers in the labour ward. Previously this was completely lacking. This project was partially financed through a donation made by FIDOS foundation.

Improving infrastructure at labour and maternity ward

A main focus of SVSH is improving maternal health. A donation was made to the hospital with the purpose of improving the infrastructure at labour ward and maternity ward. Because there were several grants and renovations going on at the time the money came in, the Sengerema DDH decided to freeze this project and look for a better moment for implementation. It is expected that this will be done in 2015.

Support in kind

As all of our members of the board and many of our donors are working in the medical field, SVSH regularly gets offered a big variety of used medical equipment which often are very useful and highly needed in Sengerema. Due to further increments in the amount of equipment offered and relatively high transport costs in the previous year, SVSH decided to organize a transport of a sea container filled with equipment in an effort to reduce costs and increase impact.

In this project we were supported to a major extent by Jacob Denkers from Denkers International B.V. Apart from being our major counsellor in advising us how to organize the transport, the firm donated all transport costs from Holland to Tanzania, including costs for buying a container.

Apart from this consignment another consignment was sent free of charge through air by "Aviation Sans Frontières" in March.

The value of all equipment sent to Sengerema in the year 2014 was estimated at roughly forty thousand euro, consisting of hospital furniture, used medical equipment and consumables. In the attachments is a complete overview of all equipment sent to Sengerema. SVSH will continue to support Sengerema DDH by sending medical equipment.

Improving ICT infrastructure of Sengerema DDH

Sengerema DDH has initiated a program for digitalization of administration. This program includes digitalizing all administration and payments, but also starting an electronic file for all laboratory and imaging techniques. This is a work in progress with the first computers installed in 2012, while still continuing to expand. Due to a donation made by MRC Holland foundation, SVSH was able to contribute financially to this project. Implementation is done by Sengerema Hospital itself. Currently SVSH has no part in the planning and technical implementation of this project.

Waterproject

The waterproject which we started in 2013 has been completed. This project was mainly funded with money generated by the 'Drink for Water' party and Wilde Ganzen Foundation. The surgical and internal medicine wards are supplied with running water. A direct connection tube has been placed from the Sengerema Water reservoir to the hospital. An electrical pump distributes the water to several smaller spare tanks. The system has been constructed by local craftsmen.

Pediatric ward

The pediatric ward has been renovated in 2013. Walls were painted and inventory has been refreshed. The remaining money was used for the construction of a shelter at the playground.

Longterm and continuous projects

Support for improved mother and child care

The supply of HIV-testing strips by government resources remained a problem in 2014. In 2012 the first project our foundation initiated was the support of purchasing HIV tests to test pregnant mothers for HIV. This frequently was and still is the only missing link for adequate diagnosis, treatment and follow up of HIV infected mothers. As treatment and follow up is sponsored through other programs and trained staff is available, providing this missing link allows the hospital to treat a lot more people for a relatively small amount of money.

Transmission of HIV from mother to child is preventable for 98% if detected in time. SVSH has provided enough funds to test 3000 women. Currently the percentage of pregnant women infected with HIV is 3% in Sengerema. On estimation 90 pregnant women infected with HIV were identified by our tests, making them aware of their disease and allowing them to initiate treatment and prevent transmission to their unborn child.

This project received additional funds from Eric de Ruijter who walked the Nijmeegse 4Daagse to raise funds.

Surgical missions of the surgical team of the Slingeland Hospital

Since the beginning of 2013 SVSH and SIMBA have intensified their collaboration. As part of this collaboration SVSH supports the surgical missions going to Sengerema since 4 years. Twice a year Erik Staal goes with a surgical team to Sengerema Hospital to offer specialist care to people at the Sengerema Hospital. These missions are very important for increasing access to specialist care, allowing people to live without disability.

SVSH supports these missions by making sure all required equipment is available and staff can be paid overtime. This makes sure that the surgical team can work efficiently and help as many people as possible in a short timeframe. All traveling and living expenses are paid by the team itself.

Infection prevention and hand alcohol

The infection prevention project started in 2013 and the main goal is to prevent transmission of communicable disease and to improve hand hygiene by staff, patients and family members. This project was initiated by two Dutch student doctors and a batch of hand alcohol dispensers was bought and hospital staff and patients were trained in the use of the dispensers. Unfortunately due to quality issues of these dispensers the majority failed within 6-12 months. However, the project showed great success and thanks to a donation in kind of Rijnstate Hospital Zevenaar we were able to distribute another amount of high quality alcohol dispensers through the hospital. These dispensers were installed in March 2014.

Staff is enthusiastic and Maik's report tells us that the pumps are frequently being used.

One of the student nurses stated: "Before every patient contact to prevent that the microorganism go from one patient to the other."

Registered Nurse Samuel Chege: "It's very convenient. You don't have to walk all the way to another ward to wash your hands."

Stephen Kamuhanda, anesthesia nurse adds: "People in the hospital like it. It is a good project and this new pumps are durable."

Our foundation continues to support this project by ensuring funds for purchase of methylated spirit required to fill the dispensers. More than 1000 liters methylated spirit were purchased with funds coming from SVSH.

Our foundation funded the purchase of personal protection kits for staff working in high risk environments. Personal protection kits consist of PVC aprons, boots and protection goggles.

Poor fund for food support

SVSH has in 2014 started to support the hospital poor fund. This fund is run by the matron of the hospital and is used to support the poorest people of the hospital who don't have any money nor relatives to take care of them. Apart from that it is also used to prepare food for children which are underfed. On average 15 people a month got food through this fund.

Once-off emergency support

On special request SVSH decided to help the hospital with two once-off donations for emergency support of essential programs.

- Support for medication for children suffering from Burkitt lymphoma, a form of childhood cancer. The hospital was supported by once-off donation of € 2000 for purchasing of medication. In combination with support received from regional programs, this is likely to be enough for at least one year or full treatment of 12 children.
- Support for blood bags and tests for the blood bank. Because of malfunctioning of the regional blood bank the hospital is forced to have its own blood bank. Due to severe financial problems the hospital was unable to do this so a once-off donation of € 1000 was done. This is sufficient to do about 300 blood transfusion.

Conclusion

In conclusion we think that 2014 was a very successful year in which we realized a number of big projects. Also we are happy to see that due to our growing budget we are able to increase the number of longer running projects. This allows us to structurally support key projects which promotes continuity and helps the hospital to organize care better.

Financial overview 2014

Balance sheet

The year 2014 has been a very successful year for fundraising. At the end of the year there was a positive balance and a 45% increase in money raised compared to 2013. Therefore we can conclude 2014 was a healthy financial year. We will strive to maintain the level of money raised for SDDH for the next years to come. There was a slight discrepancy in our balance. Since this was only a minor and a positive difference, we accepted this difference and increased our obtained assets.

Friends of Sengerema Hospital Balance sheet (as at December 31st, 2014, in euro's):

Balance 2013		Liabilities 2013	
- Cash and cash equivalents	€ 5.298,75		€0,00
obtained assets in 2014		liabilities in 2013	
- Cash and cash equivalents	€ 28.597,31		€0,00
		Equity	
		- Rabobank bank account	€33.896,06
Total	€ 33.896.06	Total	€33.896.06

Income and expenditure

SVSH has two strictly separated cash flows. We have made this distinction in order to make sure that money coming from our sponsors is always spent the right way. We are proud to say that 100% of the money coming from our sponsors is directly invested in projects for the benefit of Sengerema.

The first and most important cash flow are donations from our sponsors, which may come from private sponsors, foundations and corporations. This is money donated to benefit the hospital of Sengerema and can only be used in that way. With other words: money from sponsors is exclusively used for projects, material and other goods that benefit the Sengerema Designated District Hospital directly and not for traveling expenses or overhead costs.

The second cash flow consists of voluntary donations made by members of the board and other people who have specifically decided to contribute to overhead costs and reimbursement of expenses. Money coming from these donations is used to cover running costs including promotional materials and visits to Sengerema. Overhead costs and reimbursement of expenses can never exceed the amount donated for this goal. If there is money left after withdrawing the running costs from the total amount of these donations, this money can be used for projects that benefit Sengerema Hospital.

Statement of income and expenditure account for the year 2014 (in euro's):

Income		Expenditure		Net. Result
Income from private donations, donations made by foundations and corporations	€ 76.464,68	Foundation managed project (money spent directly to benefit Sengerema Hospital)	€ 48.744.19	€ 27.720,49
Income from board members' donations	€ 1.389,41	Running costs	€ 557,30	€ 832,11
		Expenses of members of the board	€0,00	
Total	€ 77.854,09	Total	€ 49.301,49	€ 28.552,60

Income of money coming from sponsors

Private sponsors

Compared to 2013 donations coming from private sponsors increased slightly. It is positive that we have a constant flow of donations from private sponsors. There are 67 people who are registered as a monthly or yearly donor. Another development in 2014 was the start of periodic donations.

This is an agreement for 5 years, during which the donor donates a vast amount yearly. At the end of 2014 there were already 2 donors with such an agreement, donating € 1500 total.

Apart from this group there was a significant group of private sponsors that made a single donation of various magnitudes. In total this contributed another € 6.100,00. In total private sponsors contributed € 14.167,98 directly to our foundation, which is 19% percent of our total income for 2014.

Another important contribution to this year income came for a heritage. We received a donation of € 27.643,07 as stated in that person's will.

Fundraising events by private parties

In 2014 we were very lucky to receive a lot of support from people who organized a fundraising for our foundation. In total there were 5 events, which contributed a significant amount to our total income. The total amount raised from these events was €11.812,27, which is 15% of our total income for 2014.

Funds received from other foundations

In 2013 it was the first time in which SVSH collaborated with other foundations for specific projects in order to realize them. In 2014 we continued and expanded that collaboration successfully. Last year we received € 20.200,00 from other foundations, a 150% increase compared to 2013. This contributed 27% to our income over 2014. This increase is caused by increased efforts for fundraising at other institutes and foundations.

Donations made by companies

Six companies decided to make a contribution to our foundation. With an amount of € 2.641,36 this was 3% of our income.

Overview of all incomes

Category	Name of sponsor	Amount donated	Total per category
Donations made by regular contributors	67 different private sponsors	€ 5567,98	€ 5567,98
Donations from foundations	Protestantse Gemeente Hellevoetssluis	€ 5.000,00	
	Donation Pius XII for transportation of materials	€ 2.000,00	
	Stichting MRC Holland	€ 10.000,00	
	Paideusis	€ 1.000,00	
	Carnavalsvereniging de Umdraeyers	€ 1.000,00	
	Stichting Fidos	€ 1.200,00	€ 20.200,00
Periodic tax deductable gift	3 different private sponsors	€2.500,00	€2.500,00
Private fundraising	Cheque Williams Family	€ 2.974,55	
	Pierre Wielders	€ 180,27	
	Wedding Hilde & Michiel	€ 396,45	
	Cycle for Future	€ 6750,00	
	Walk 4 Future (Eric de Ruijter)	€ 1.511,00	€ 11.812,27
Sponsoring by companies	Medtronic Trading	€ 2.000,00	
	Various companies	€ 641,36	€ 2.641,36
Other private donations	Heritage	€ 27.643,07	
	Various persons	€ 6.100,00	€ 33.743,07
Total income from our sponsors			€ <u>76.464,68</u>

Spending of donor money

In our decision-making how to spend sponsor money we follow some basic rules. Key factors are :

- 100% of the sponsor money should be used to benefit the hospital.
- Donated money should be used as efficiently as possible.
- At least 50% of the raised money should go to projects that strive to cause a structural improvement in the quality of care for a prolonged (years) period of time. Examples include specialized medical equipment, improvement of labour ward and investment in ICT of the hospital. As seen in the table below, these projects represent € 36.742,49, which is almost 75% and thus well above our minimal goal of 50%
- A maximum of 50% was set to use for acute needs required to maintain a basic level of care, examples include HIV tests, disposables for the operation room and gloves.

Overview of all expenditures in 2014

Structural projects

Material support:	€ 12.321,87
• € 4.381,91: expenditure materials	
• € 7.939,96: transportation costs	
Labour ward	€ 11.920,62
ICT project	€ 10.000,00
Hepatitis B project – Purchase of vaccins	€ 2.500,00
	<hr/>
	€ 36.742,49

Non-structural projects

Spending for support of mission of surgical team of Erik Staal	€ 2.001,70
• € 1.150 for plaster of Paris for surgical patients	
• € 810 for overtime staff	
• € 41,70 for material support	
Bloodbank	€ 1.000,00
HIV tests	€ 3.000,00
Contribution to treatment of children with Burkitt lymphoma	€ 2.000,00
Alcoholic disinfectant project	€ 2.000,00
Poor funds	€ 2.000,000
	<hr/>
	€ 12.001,70

Total	€ 48.744,19
--------------	--------------------

Longer running projects

As seen in the overview above, € 7.500 has been spent on projects we have been supporting for a longer period. The money is spent on HIV tests, Hepatitis B vaccinations and hand sanitation. 15% of our total expenditure is spent on these projects. This is only a small part of our complete budget, but it is important to us that these projects continue to run.

Material support

A large portion of our expenses is made on material support; both on the material itself as on the costs for transportation of these materials to Sengerema, Tanzania. 25% of the money spent was with this purpose. This is a 100% increase compared to 2013 (12.5%). This difference is due to an increase in amount of material bought and higher transport costs. As can be seen in the attachment the amount of goods arriving in Sengerema has increased significantly.

The balance at the end of 2014 for money coming from donations was: € 27.720,49

Overview of running costs and expenses of SVSH

Income coming from donations from the members of the board.

As mentioned in the introduction we keep the money coming from our members of the board separated from the money from our sponsors. We do this because the money coming from this source is used to pay for our running costs and expenses made by our board members when they visit the project site. The total amount of money coming from donations by the members of the board in 2014 was € 1.389,41.

Running costs and expenses

The table below shows an overview of the running costs and expenses made by our foundation. We take pride in the fact that the running costs were low and could easily be paid for from our own funds. No money from our sponsors was used, as stated in our basic rules.

In summary, in 2014 the total amount of money donated by the members of the board was € 1.389,41,00. A total of € 557,30 was spent on running costs and other expenses, which makes the balance € 832,11 euro positive for this year. This adds up to last year's positive balance of € 1.298,60. This residual of € 2.130,71 will be used for projects in Sengerema and as a reserve for our foundation. This demonstrates our healthy financial situation.

Income for SDDH through different routes affecting SVSH

Next to the formal channels of donation there have also been donations that supported our foundation but were arranged through other channels. Therefore these are not included in our financial overview. However, we would like to mention them as a token of appreciation and to acknowledge other persons / parties with the same commitment to help Sengerema Hospital.

We are very grateful to "Aviation sans frontiere" foundation. This foundation supports NGO's like ours by providing free shipment by air. This enabled us to send the oxygen concentrators free of charge by air from Amsterdam to Dar es Salaam.

Also not included in the financial overview is the donation of transportation costs and purchasing of the container by Denkers international B.V. SVSH did not have to pay anything for transport of this container until the container arrived in Dar Es Salaam. This helped significantly in keeping transport costs low. We are very grateful for all the support of Denkers international B.V.

In-kind donations (materials and equipment) contributed a significant amount to our total income. The equipment collected from different hospitals is estimated to have a total local value of 30.000euro. However these estimates are difficult to make as all equipment is used material and therefore the prices vary significantly. In the attachment we included an overview of the material sent to Sengerema. This list includes most, but not all equipment sent.

We are specifically grateful to:

- Orthopedic clinic "Orthopedium" who donated an operation table, which was highly needed.
- Hospital "Medisch centrum Alkmaar" who donated 18 hospital beds, 51 bed side cabinets and 2 stretchers.
- Laurentius Hospital Roermond who donated several monitors, infusion pumps and various medical supplies.
- Rijnstate Hospital Arnhem organization contributed significantly by donating various hospital furniture, alcoholic hand-rub dispensers and consumables.
- Radboud university medical center Nijmegen helped us by donating infusion pumps, patient monitors and consumables.
- Student Organization Panacea Groningen did a generous donation.
- Flexxis BV and Heijn van de Weijer who supported the Cycle For Future team greatly to achieve their goals and supported us to promote our foundation.

The biannual visits of Erik Staal from SIMBA foundation and his surgical team contributed a significant amount in human capital. Also in 2014 Erik Staal came twice to Sengerema for two weeks with another surgeon and three other professionals. By investing their time and knowledge into Sengerema hospital on their own charges, they make a big difference in people's everyday lives. Of course these investments cannot be put in money.

Expenses not declared also contribute significantly in keeping running costs at a low level. All members of the board pay for their own travel expenses in Holland, drinks and food at meetings and office equipment. No wages were paid.

It is hard to put a price on these combined efforts and contributions made, however we think the total contributed significantly to improve the quality of healthcare in the Sengerema Hospital.

Future perspectives on financial management

After two successful years of fundraising and contributing to SDDH, we are very proud that we can continue to support SDDH to at least the same extent. We realize that growth in income is not a goal, but that the aim should be to contribute to SDDH as much as possible.

A big improvement in 2014 was the commencement of the periodic donation. By having donors signing an agreement to donate a vast amount for five successive years, we have more certainty of our income for the upcoming years. That enables us to fund and set up more longer running projects. We aim to fund longer running projects solely with regular contributions, to ensure continuity of these projects. If costs exceed these donations, we will have to look for ways to increase our regular income.

In 2015 we aim to convert members of the Club of 100 from their regular donation to a periodic donation. For the donor this carries a tax advantage; for us it gives us more stability in expected income for the upcoming years and the option to start up longer running projects.

For once-off projects we will continue to make a separate budget. Partly this can be paid from fundraising and once-off donations by private sponsors. If extra money is required for these projects we will try to collaborate with other foundations or try to organize a fundraising ourselves in order to get the required funds.

In summary our foundation has been very successful in attracting funds and sponsors to support the Sengerema Designated District Hospital. As the hospital is growing rapidly and is going through some rapid changes it will be a challenge to keep and/or make the hospital up-to-date and ensure continuity of care. As funds for structural improvement remain low, the demand for our support remains.

We hope that we can continue our aid in close collaboration with the hospital in a critical but optimistic way.

Attachment: Donated material

Description of goods brought by sea container, container remained is Sengerema for functioning as office/storage.
1 Second hand operation table; medifa Mat 5000, including leg-holders
3 second hand Stryker emergency department beds
2 aluminum standards for monitor
2 steel Trashcans
3 used office chairs
1 anesthetic trolley filled with materials including: 3 pair of crutches Orthopedic braces for knee immobilization Clothing for ambulance personnel Emergency suitcase for ambulance life size plastic model of skeleton for teaching purposes
51 used Stalo medico nightstands
18 used oostwoud opticare nova hydraulic hospital beds
16 used Stiegelmeyer hydraulic hospital beds
2 used oostwoud opticare nova hydraulic stretchers
51 used Medical anti bedsore mattresses
3 Dewert electrical adjustable patient chairs
Getinge Sterilisation machine
10 euro-dispensers for alcoholic handrub
10 euro-dispensers for alcoholic handrub
10 euro-dispensers for alcoholic handrub
5 Orthopedic shoulder supports
6 boxes Dyna cuff and collar for shouder support BSN bandage material
Cellacast active; plaster for limb stabilisation by Lohmann & Rauscher
Blue plastic bag with orthopedic braces.
204x 50 ml Syringe BD Plastic
10 euro dispensers for alcoholic handrub
